

# Red Torque – WRO 2026 Component Breakdown

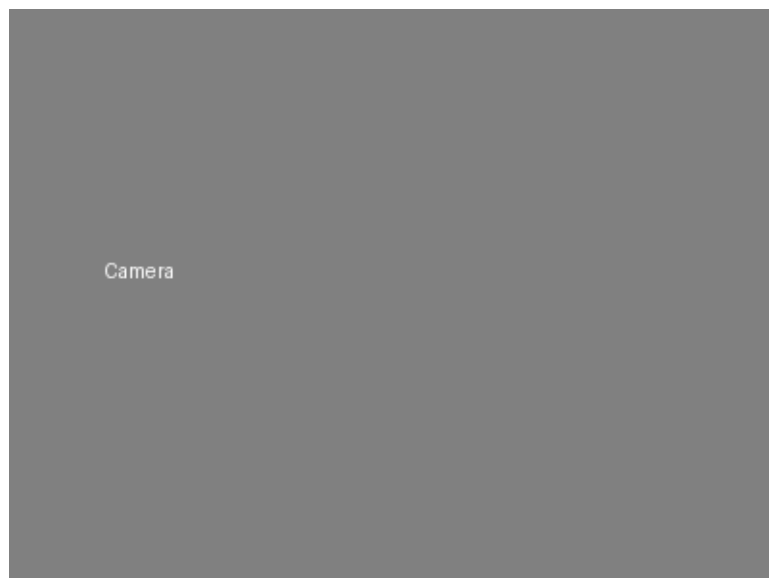

## Core Processing System

Raspberry Pi 5 handles vision and logic. ESP32 controls motors and real-time tasks.

## Vision System

Pi Camera v2 detects red and green cubes for navigation.

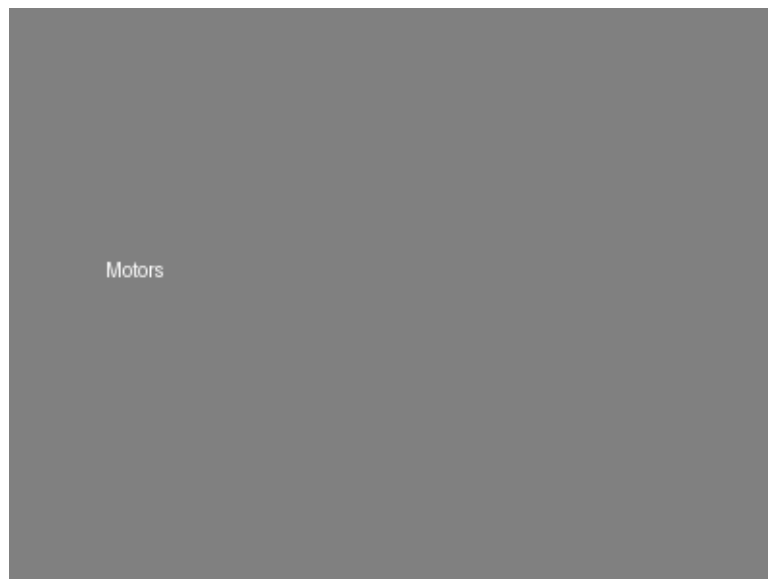

## Mechanical System

LEGO Technic chassis provides modular and precise structure.

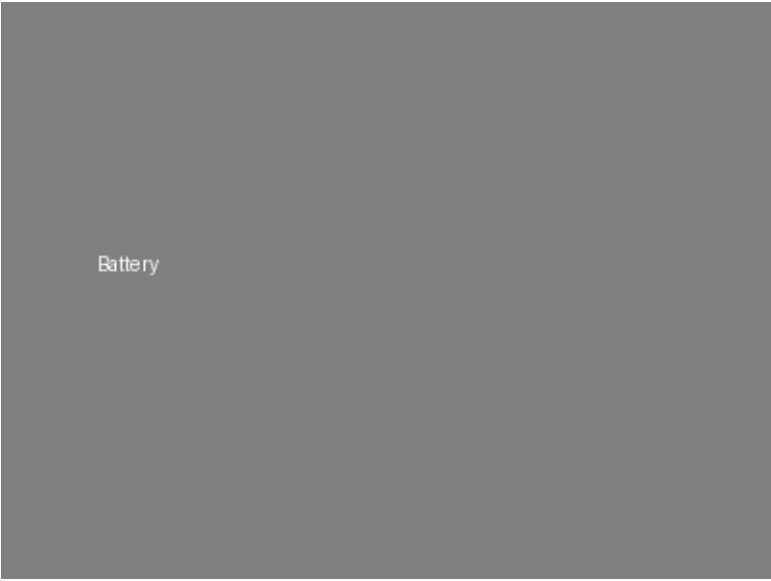

## Drive System

Motors and servo enable movement and steering.

## Power System

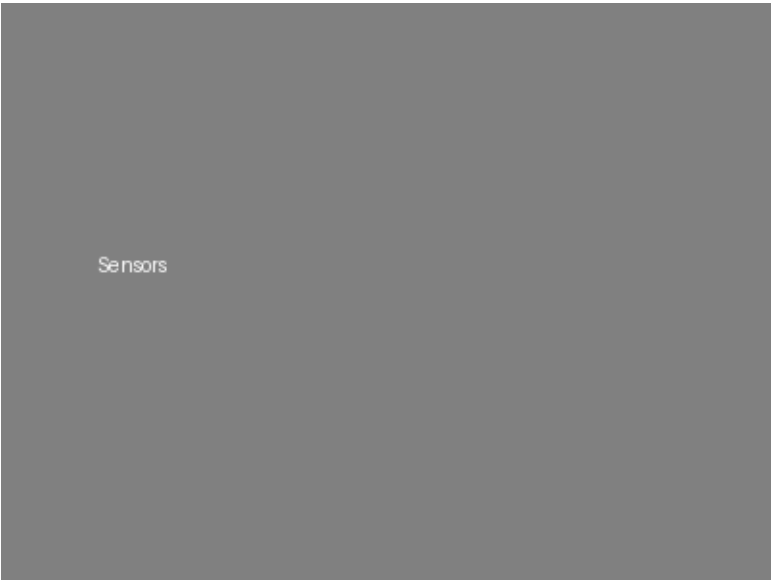

Battery with BMS and converters powers all subsystems.

Battery

**Sensor System**

IMU and ultrasonic sensors provide environment feedback.

Sensors
